DETAILED ACTION

1. In response to the first Office action, Applicant has amended claims 1, 7, and 11-14. Claims 1-17 have been examined.

Priority

The following is a quotation of the appropriate part of 35 U.S.C. 120:

An application for patent for an invention disclosed in the manner provided by the first paragraph of section 112 of this title in an application previously filed in the United States, or as provided by section 363 of this title, which is filed by an inventor or inventors named in the previously filed application shall have the same effect, as to such invention, as though filed on the date of the prior application, if filed before the patenting or abandonment of or termination of proceedings on the first application or on an application similarly entitled to the benefit of the filing date of the first application and if it contains or is amended to contain a specific reference to the earlier filed application.

2. Applicant has not complied with one or more conditions for receiving the benefit of an earlier filing date under 35 U.S.C. 120 as follows: the application to which the instant application has been filed as a continuation, U.S. Patent Application No. 09/615,697, is unrelated to the instant application.

Applicant had previously claimed priority to U.S. Patent Application No. 09/615,967, filed 14 July 2000, which is a related application, but with which the instant application has no inventors in common.

3. Applicant's claim for domestic priority under 35 U.S.C. 119(e) is acknowledged. However, the provisional application upon which priority is claimed fails to provide adequate support under 35 U.S.C. 112 for claims 1-14 of this application. Application

60/151,531 discloses the use of signatures for file verification (see page 17), but does not provide for the separate computation of a second file signature, as recited in each of the instant application's independent claims.

Drawings

4. The drawings were received on 18 June 2004. These drawings are acceptable.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1-14 are rejected under 35 U.S.C. 102(e) as being anticipated by U.S. Patent Application Publication No. 2002/0157021 to Sorkin et al.

Sorkin is a continuation of Application 09/615,967, which contains the specification of the instant application in its entirety. As has been noted above, the instant application cannot claim priority to 09/615,967 because it has no inventors in common.

Response to Arguments

6. Applicant's arguments, see Remarks, filed 18 June 2004, with respect to the rejection(s) of claim(s) 1-14 under 35 U.S.C. 102 and 103 have been fully considered and are persuasive in view of Applicant's amendments. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of U.S. Patent Application Publication No. 2002/0157021 to Sorkin et al.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

U.S. Patent No. 6,351,811 to Groshon et al. discloses the use of multiple file signatures.

U.S. Patent No. 6,742,121 to Safadi discloses a system for using signatures for verifying software downloads.
